PORTFOLIO

Actor-Movie Database

<https://vi3t4lov3.github.io/GRP12-The-Movie-Finder/>

April 2022

Created a database to easily search any actor/actress or movie. Used HTML/Css, Framework, Javascript, and JQuery. Has localstorage to maintain history of searched items,

Weather Outlook

<https://torihendricks927.github.io/HW-6-Weather-Outlook/>

March 2022 - April 2022

A website developed for users to look up any city and be provided with a 5-day forecast including the weather, humidity, UV index, and wind. Created using HTM/Css and Javascript.

Daily Planner

<https://torihendricks927.github.io/HW-5-Daily-Planner/>

March 2022

Developed for clients to use to organize a busy schedule by creating a color-coordinated calendar that can save and delete events. This was created using HTML/Css, Bootstrap, and Javascript.
